SKILLS

Frontend Engineering

- **Languages** - TypeScript/JavaScript (ES6+), HTML5, CSS3
- **Frameworks** - React.js (5+ years), Next.js, Vue.js, Astro.js
- **State Management** - Redux, Context API, Zustand
- **Testing** - Jest, React Testing Library, Cypress
- **Performance** - Core Web Vitals optimization, Bundle analysis, Lighthouse
- **Design Systems** - Component libraries, Storybook, Design tokens
- **Build Tools** - Webpack, Vite, ESLint, Prettier

Backend & DevOps

- **Backend** - Node.js, Express.js, REST APIs, Microservices
- **Databases** - PostgreSQL, MongoDB, Redis
- **Infrastructure** - Docker, Kubernetes, AWS, CI/CD pipelines

General

- **Languages** - Native Spanish, English C1
- **Methodologies** - Agile, Kanban, Scrum

EXPERIENCE

Confiao

Caracas, Venezuela

Tech Lead & Frontend Architect - technologies: **React.js, TypeScript, Node.js, PostgreSQL, MongoDB, System Design** 2025.05-present

- Led frontend architecture decisions, establishing React component libraries and design system patterns used across multiple teams.
- Mentored 3+ developers on React best practices, TypeScript adoption, and testing strategies, improving team code quality.
- Designed and implemented scalable microservices architecture with React frontend, improving application performance and maintainability.
- Established CI/CD pipelines and testing strategies (Jest, React Testing Library) ensuring production reliability.
- Optimized Core Web Vitals and bundle sizes, achieving 40% reduction in initial load time.

PagoChinchin

Caracas, Venezuela

Full Stack Developer - technologies: **React.js, Node.js, PostgreSQL, MongoDB, REST APIs, Payment Systems** 2021.05-2025.02

- Developed React-based merchant dashboards and web flows for payment processing, handling real-time transactions.
- Built shared component libraries and internal tools used by multiple teams, improving development efficiency.
- Integrated payment gateways (Mastercard, Pago Móvil) with React frontends, ensuring cross-browser compatibility.
- Optimized web performance for mobile users on variable network conditions, improving conversion rates.
- Contributed to microservices architecture for payment processing, collaborating with backend teams.

Automation Group

IoT Specialist - technologies: **ESP32, Node-RED, React.js, InfluxDB**

2019.10-2020.02

- Built React.js dashboard for real-time monitoring and management of residential water tank systems.

EDUCATION

U.N.E.F.A

Electronic Engineering

2012.10-2017.11

PROJECTS

- Built portfolio website with Astro.js, React components, and Vercel deployment *simonctech.com*
- Developed React.js fitness tracking application with responsive design and state management *workout-logger.com*
