SKILLS

Engineering

- **Languages** - JavaScript/TypeScript (Node.js), Golang
- **Frontend** - React.js, Angular, Vue.js, HTML, CSS, Bootstrap, Astro.js
- **Backend** - Express.js, REST APIs, Microservices, Node.js
- **Databases** - MongoDB, PostgreSQL, DynamoDB, Redis
- **AWS** - Lambda, API Gateway, SQS, Cloud services
- **Infrastructure** - Docker, Kubernetes, AWS, Proxmox, Dokku
- **Tools** - Git, terminal, Neovim

General

- **Languages** - Native Spanish, English C1, Basic French
- **Methodologies** - Kanban, Scrum

EXPERIENCE

Confiao

Caracas, Venezuela

Tech Lead - technologies: *Node.js, Express, MongoDB, PostgreSQL, AWS, Microservices, Docker* 2025.05-present

- Designed and implemented microservices architecture using Node.js and Express, improving system scalability and maintainability.
- Developed efficient RESTful APIs for service communication, integrating MongoDB and PostgreSQL databases.
- Implemented AWS solutions for application deployment and management, optimizing costs and performance.
- Configured CI/CD pipelines and development environments with Docker, facilitating collaborative team work.

PagoChinchin

Caracas, Venezuela

Backend Developer - technologies: *Node.js, Express, MongoDB, PostgreSQL, REST APIs, Microservices* 2021.05-2025.02

- Developed scalable microservices using Node.js and Express, integrating MongoDB and PostgreSQL for data storage.
- Implemented RESTful APIs for integration with payment systems and third-party services, ensuring high availability.
- Contributed to microservices architecture design for payment processing, handling real-time transactions.
- Integrated AWS services for application deployment and scalability, improving system reliability.

Automation Group

IoT Specialist - technologies: *ESP32, Node-RED, InfluxDB*

2019.10-2020.02

- Increased awareness of household water consumption by developing a monitoring and management system for residential water tanks.

EDUCATION

U.N.E.F.A

Electronic Engineering

2012.10-2017.11

PROJECTS

- Developed my portfolio using Astro.js and Vercel, and published it on a public domain *simonctech.com*
- Developed an application to track gym workouts *workout-logger.com*
